## NO SUGAR ADDED RANGE

CJ only contain natural ingredients
meet the requirements of our All Natural range
C〕 ensure that the amount of added sugars is significantly lower than in traditional gelato, thus reducing the calorie content

Co Produce truly delicious gelato (unlike some other sugarfree products): the taste of the fruit flavours in particular is on a par with that of gelato containing added sugars

Erythritol: with essentially no effect on blood sugar and blood insulin levels, it is a sound substitute for sucrose and helps to reduce the glycaemic impact of products in a diet.

Sorbitol: the glycaemic index of sorbitol is lower than that of regular white sugar. It is a substance that is partially absorbed in the intestines, so it does not stimulate insulin secretion.

Maltitol: as well as playing a part in tooth decay prevention, it can help to keep blood glucose levels stable, without glucose and insulin spikes.

Fruit Variegati

A very wide range that includes both a line rich in whole or chopped fruit and the new Fullyfruit with a very high fruit content.

## Fully Fruit

## All of the delights of fresh fruit

Fruit is an extremely important ingredient in both gelato and pastries.
What could be more refreshing and pleasant than perfectly ripe seasonal fruit?
However, fruit is not always available, it can be hard to find produce with the ideal level of ripeness, and you have to take great care when buying it and handling it before use.

Thanks to cutting-edge technology that stabilizes products without altering the flavour and aroma of fruit, we can provide all of the delights of fresh fruit in the most suitable form for use.

## ADVANTAGES

Fullyfruit is a totally natural product with an extremely high fruit content (45/50\%).
It preserves the finest characteristics of fruit, it is ready for use variegate in the gelato and it does not freeze in display cases.

- It is versatile: as well as inside gelato, it can be used for covering the surface of gelato in tubs and also in pastry making, to go inside semifreddo and gelato cakes.

It is an original way to create new texture and flavour sensations.

- It is long lasting: thanks to a technological process that keeps the fruit fresh for longer and packaging that prevents all forms of environmental contamination, the product has a shelf life of 12 months. Once the packaging has been opened, the product must be kept in a refrigerator and used within three days.
